Education

new english high school
10th SSC 83%

New english high school and junior college
12th HSC 88%

Shri mathuradas mohota college of science
BSc IT 2026

Projects

Personal Portfolio Website | HTML, CSS, JavaScript, Python Flask

Developed responsive portfolio with Flask backend to handle contact form submissions

- Integrated SQLite database to store user messages and added dark/light mode using JavaScript

Deployed on Render for live demonstration

2. Student Management System | Python, Flask, MySQL, Bootstrap

- Built full-stack CRUD application for managing student records with search functionality
- Used Flask-SQLAlchemy for database operations and Bootstrap 5 for mobile-friendly UI
- Implemented data validation and session-based authentication

3. Weather App | Python, JavaScript, OpenWeather API

- Created real-time weather app using OpenWeatherMap API and Python Requests library
- Built dynamic frontend with JavaScript to display temperature, humidity, and wind speed
- Handled API errors and invalid city inputs gracefully

4. To-Do List App | JavaScript,HTML,Css, local storage

- Designed interactive task manager with add, delete, and mark-complete features
- Utilized LocalStorage API for data persistence across browser sessions
- Focused on vanilla JavaScript DOM manipulation and event handling
